DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-12, drawn to an outer garment with a pocket and vest liner, classified in class 2, subclass 247.
- II. Claims 13-17, drawn to a sling system with an ring and tether to secure a personal item, classified in class 2, subclass 300.
- III. Claims 18-20, drawn to an outer garment and an anchor to securely hold a wire, classified in class 2, subclass 244.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions Group I, Group II and Group III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the pocket and liner of group I is not needed in the sling system of group II or in the anchor and wire system of group III.
- 3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II or III, restriction for examination purposes as indicated is proper.
